UCSF has signed a 20-year lease with the San Francisco Unified School District for occupancy of the Laguna Honda Elementary School at 1350 Seventh Avenue, which is now vacant.

UCSF will beautify the outside area by adding trees, bushes and walkways. Interior renovation will involve updating the facility while preserving the school's original character.

Housed at the new location will be UCSF's Center for Deafness and the Human Development and Aging, Human Sexuality and Medical Anthropology programs. The first move will occur early this month.

The lease covers only the school building and does not include the adjacent playground or parking lot. The city parking authority is scheduled to develop the parking lot for the neighborhood. UCSF will operate a shuttle service from the main campus to the school.

UCSF's United Way Campaign will take place this year through the campus mail only, November 17 to 26. No representatives will visit offices or other units to seek contributions, but instead, a booth will be erected in the lobby of Medical Sciences and will serve as a collection point for the pledge cards for the duration of the campaign. The goal for this year's campaign is $90,000.

Individuals who contribute will receive a lottery ticket for prizes that include a color TV set, stereo, portable AM/FM radio and many others. The drawing will be the week following the campaign. In addition, several of ten different recipes from some of UCSF's most talented cooks will be in each envelope along with the pledge cards.

Changes also have been made in the overall United Way campaign. The California Division of the American Cancer Society has designated the United Way as the organization to receive gifts directed to it from institutions and businesses. The United Way also has set aside an annual $100,000 for the Bay Area Black United Fund, serving the needs of the Bay Area's approximately 450,000 blacks.

Donor option cards to earmark gifts for any of the 205 United Way-sponsored organizations are still available as in the past. Arthur **Lundblad, assistant dean** of the School of Dentistry is this year's UCSF campaign coordinator.

NEWS BRIEFS

UCSF's Transportation Services has been given the President's Award for Energy Efficiency for the ride-sharing and vanpooling program. The award, which recognizes outstanding accomplishments by organizations and individuals who successfully achieve the energy conservation goals established by President Carter, was set up in April of this year.

Jim Wood, transportation officer, Business and Fiscal Services, received the award on behalf of UCSF during ceremonies in October. Four other recipients from the Bay Area were Caltrans, United Airlines, Hewlett/Packard Company and a private citizen.

The award coincides with the fifth anniversary of the UCSF Vanpool Program, which started in September of 1975 with two 12-passenger vans and has since grown to 30 vans with almost 400 participants. Each van replaces approximately seven cars, resulting in an annual reduction of 140,000 miles of travel and 13,300 gallons of fuel. For UCSF's total program that means over four million miles of travel and 400,000 gallons of gasoline saved per year.

The Fifth Herbert McLean Evans Memorial Lecture will be held on Wednesday, November 19 at 2 p.m. in Cole Hall. Jesse Roth, chief of the Diabetes Branch at the National Institute of Arthritis, Metabolism and Digestive Disease in Bethesda, will speak on "Insulin and its Receptor: Is the Receptor More Important than the Hormone?"

Roth, recognized world-wide for his research on insulin receptors, has received many awards for his contributions to the study of diabetes, including the Ernest Oppenheimer Memorial Award of the Endocrine Society. This year he received an honorary doctorate from the University of Uppsala in Sweden.

The lecture is sponsored by the Department of Anatomy in honor of the late Professor Herbert McLean Evans, a distinguished UC biologist.

Nominations are now being accepted for the UCSF Medal, an award given in recognition of distinguished service to the campus and to the field of education and health care. The award will be presented in the Spring to four individuals, two of whom are from the community.

Individuals who have made a major personal contribution to UCSF are eligible except for those in administrative or policy making positions. Faculty members should have been emeritus for at least one year.

Nominations, including a brief resume of the individual's contributions to UCSF, should be sent to the Chancellor's Office, Room S-126 before December 1. For further information call x2401.

UCSF faculty and staff will be featured in a five-part series entitled "The Facts of Birth" on KGO-TV, Channel 7 News on Tuesday to Friday, November 18 to 21. Russell K. Laros, Jr., acting chairman and professor and Robert K. Creasy, professor, both Obstetrics and Gynecology; Roderic H. Phibbs, professor, Pediatrics; and Marie Herron, clinical research nurse, Obstetrics, are featured in this mini-documentary. Both Phibbs and Creasy are also associate members of CVRI. The series will air on the five o'clock news, November 18 and the eleven o'clock news, November 18 to 21.

Construction work of sealing the decks and roofs of the new Long Hospital has begun and will continue through November 21. The heated asphalt being used gives off an unpleasant odor which necessitates turning off the air intake fans in the adjacent areas while the material is being heated for application. It is suggested that windows in Moffitt, especially on the south and east wings, should be kept closed. The sealing work must be completed before the beginning of the rainy season, and the asphalt must be applied during the day so the surfaces are dry.

The latest steps taken in response to the recommendations of the Chancellor's Emergency Task Force on Personal Safety are:

GARAGE SECURITY

- All drivers are asked to park on the H level of Millberry Union garage and wait for the Night Security Shuttle for escort across Parnassus.
- To help expedite traffic flow, decal holders leaving through the public exit during the evening hours no longer have to complete the reciprocal voucher form. Instead, an attendant will record your decal & license number as you leave.
- A two-way emergency alarm/communication system between garage floors, elevators and the Police Department is planned. Installation will take several months. The speakers will be clearly identified.

GENERAL CAMPUS SECURITY

- Two new officers recently joined the Campus Police Department. They are Mary Asmus and Gregory Tracey.
- Faculty, students, staff and visitors are reminded to use the Night Security Shuttle which operates seven nights a week, 5:30 p.m. to 2 a.m. It leaves approximately every 15 minutes from the front doors of Moffitt and the bus shelters at Langley Porter and the new School of Dentistry building, and the H level of MU Garage. There are now two shuttles. One goes in a North/South direction, the other East/West, and transport people to the garage, public transit stops, homes and parked cars within the areas bordered by Clarendon, Clayton, Golden Gate Park and Ninth Ave. For further information call x1414.

SAFETY CLASSES

- A self defense workshop will be held Saturday, November 15, Room N 517, 9 a.m. to 5 p.m. It is free for UCSF students, faculty and staff; general $15.
- Tear Gas (MACE) classes will be given on Monday, December 1, noon to 2 p.m. in Toland Hall and on Wednesday, December 10, 5-7 p.m. in Room C 130. They are free for UCSF students, faculty and staff. Individuals are reminded that preregistration is required for admittance to all classes. For further information call x5683.
- A slide show presentation "Sources of Male Violence" will be shown on Tuesday, November 18, noon to 1 p.m. in 300 HSW. It is free and open to the public.

Julius R. Krevans, dean of the School of Medicine has been installed as chairman of the Association of American Medical Colleges (AAMC) at the organization's 91st Annual Meeting held in Washington, D.C.

He succeeds Charles B. Womer, president of the University Hospitals of Cleveland, Ohio. John A.D. Cooper is full-time president of the Association.

Krevans will head the AAMC Assembly, which oversees the activities of the three councils and one organization that govern the prestigious Association. They are the Council of Medical School Deans, representing all 126 U.S. schools, the Council of Teaching Hospitals, the Council of Academic Societies and the Organization of Student Representatives.

Krevans has been active in the AAMC since the 1960s and has served as chairman of the Council of Deans and as a member of the Executive Council. He has been dean of the School of Medicine since 1971.

Three childbirth films are being shown the first Friday of every month at SFGH. The films, "Five Women, Five Births," "Happy Birthday" and "A Time to be Born," are shown in Carr Auditorium, Pathology Building from 7 to 9 p.m., following which the staff shows slides from deliveries at SFGH and leads a short discussion. The program is sponsored by the UCSF Nurse/Midwifery Service at SFGH. A donation of one dollar is suggested.

In addition, two new childbirth films, culturally and linguistically tailored to Spanish-speaking expectant parents, have been produced by the UCSF Bilingual Media Project based at SFGH. The films are "Nueva Vida" (New Life), which covers the father's involvement in the birth process, and "Parto Por Cesarea" (Cesarean Birth), where the father is present during the Cesarean operation. They are designed for parents-to-be, families, health professionals and as family life education for teenagers. For information on how to obtain these two films contact Terry Looper, 282-4768.

Current CPR certification is now a requirement for renewal of physicians' licenses. In some clinical departments new house officers and faculty members have not yet been scheduled for CPR training. It is advised that these physicians schedule their training well in advance of their license renewal dates to avoid difficulty. Physicians in compliance with UCSF's certification policies are also in compliance with the Board of Medical Quality Assurance.
